HRX 3000

RFID Proximity Fob | Card Terminal

The HRX Series of contact-less attendance terminals are designed and manufactured in the UK. All are available with expandable employee capacities should your business needs change.

Expanding on the functions of our base level 1000 model, the 3000 can be connected to your fire alarm for roll call reporting. Optionally a keypad can be added to allow business IN/OUT and cost centre inputs.
