Seiko QR395

Calculating Electronic Time Recorder with Daily & Running Totals

A versatile time recorder that can calculate for up to 100 employees over a weekly, bi-weekly or monthly period. Combined with our pre-coded clock cards, it will tally up all accumulated hours per day along with a running total and eliminate over stamping to further reduce administration. Complete with a variety of selectable modes to track absences and mark lateness, the Seiko 395 sets a new standard for calculating time recorders.

Printing Format Examples

One Line per Day

IN/OUT Punch Only

IN ①	OUT ②	IN ③	OUT ④
